OBJECTIVE

Motivated B.Tech Information Technology graduate (CGPA 8.1) seeking a fresher Software Developer role. Proficient in Java, MySQL, HTML, CSS, and JavaScript, with hands-on project experience in CRUD applications and responsive web development. Familiar with OOP, SDLC concepts, and Git.

TECHNICAL SKILLS

Programming Languages: Java, C, JavaScript (intermediate), Python (basic)
Web Development: HTML5 (intermediate), CSS3 (intermediate), Responsive UI Design
Database: MySQL (CRUD operations, relational schema design)
Tools: Git, VS Code, Eclipse
Concepts: OOP, Data Structures (basic), SDLC, Agile (awareness)

EDUCATION

B.Tech – Information Technology | Dr. Mahalingam College of Engineering and Technology 2021 – 2025
CGPA: 8.1

HSC (Class XII) | Sowdambika Matric Higher Secondary School 2021
Percentage: 92%

SSLC (Class X) | Mount Giris Matric Higher Secondary School 2019
Percentage: 91%

EXPERIENCE

DBU Executive | Hitachi Payment Services Sep 2025 – Jan 2026

- Handled installation and deinstallation processes, making sure each task was completed accurately.
- Worked with databases to maintain and update records, keeping data accurate and up to date.
- Used MS Excel to track and organize operational data for day-to-day work.

PROJECTS

Smart Invoice PDF Generator *HTML | CSS | JavaScript*
Live Demo: priyadharshini250903.github.io/Invoice-App | Code: github.com/Priyadharshini250903/Invoice-App

- Built a web-based Smart Invoice PDF Generator using HTML, CSS, and JavaScript where users enter the client name, invoice date, and line items (description, price, quantity).
- Wrote JavaScript to add line items dynamically and calculate the subtotal, 18% GST, and grand total automatically.
- Used the Print / Save as PDF function to export the final invoice as a PDF file.
- Styled with CSS for a clean, responsive layout; hosted on GitHub Pages with the source code on GitHub.

Student Management System *Java | MySQL | OOP*

- Built a console-based Java application to manage student records with add, view, search, update, and delete operations.
- Stored student details in a MySQL database and implemented full CRUD operations (create, read, update, delete) with a search feature.
- Used ArrayList to handle records within the program and structured the code with reusable methods.
- Applied OOP concepts such as encapsulation and modularity to keep the code organized and easy to maintain.
- Added input validation to handle invalid entries in record management scenarios.

Blog Website *HTML | CSS | JavaScript*

- Developed a multi-page blog website using HTML, CSS, and JavaScript with a clean UI and consistent layout and typography.
- Used JavaScript to build dynamic content sections.
- Applied responsive design with CSS so pages are readable on different screen sizes.

CERTIFICATIONS

JavaScript for Beginners | Simplilearn (Online Course)

- Learned core JavaScript fundamentals: variables, data types, functions, and loops.
- Applied JavaScript in the Smart Invoice PDF Generator and Blog Website projects.
